

November 25, 2008

Bonnell Aluminum announces its energy surcharge for December 2008 shipments

With natural gas continuing to post prices below the threshold of \$8.85/MMBtu, December shipments will not carry any natural gas surcharge component.

The US national average diesel retail price for November declined to \$2.876/gal from October's \$3.576/gal, reducing the diesel price component of the energy surcharge to \$0.024/lb.

As a result, Bonnell Aluminum's energy surcharge for December shipments will be adjusted down from \$0.029/lb to **\$0.024/lb.**
